DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it contains the word "means". Correction is required. See MPEP § 608.01(b).

Drawings

3. The drawings are objected to because all the boxes in figures 14-16, 19-22, 51, 52 and 54 need to be labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Art Unit: 2635

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claim 9 is objected to because of the following informalities: on the third line of claim 9, "a" should be deleted. Appropriate correction is required.

5. Claim 22 is objected to because of the following informalities: on line 5 of page 128, "wherein t operation" should be changed to "wherein the operation".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph for failing to disclose in the specification an adequate disclosure showing what is meant by "operational signal selecting means", "information setting means", "tactile operation means setting means", "tactile operation means setting information supply means",

"sound related information supply means" and "information modification means".

Although [35 U.S.C. 112, sixth paragraph] statutorily provides that one may use means-plus-function language in a claim, one is still subject to the requirement that a claim particularly point out and distinctly claim the invention. Therefore, if one employs means-plus-function language in a claim, one must set forth in the specification an adequate disclosure showing what is meant by that language. If an applicant fails to set forth an adequate disclosure, the applicant has in effect failed to particularly point out and distinctly claim the invention as required by [35 U.S.C. 112, second paragraph].

8. Regarding claim 16, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Allowable Subject Matter

9. Claims 24-30 are allowed.

Regarding claim 24, the prior arts of record fail to teach or disclose a tactile input/output apparatus that includes a mechanical clutch mechanism disposed at some midpoint in a drive force-transfer path to selectively drive a plurality of up-and-down key tops using a single drive motor, the tactile input/output apparatus comprising a frame, a motor mounting frame, a plurality of drive motors fixed to the motor mounting frame; a drive motor controller, drive force output units attached to an output shaft of each drive motor as claimed in claim 24, and positioning driving means that respectively drives the

Art Unit: 2635

frame and the motor mounting frame in a parallel direction without rotation, and connects the drive force output units of the drive motors to the up-and-down key top moving means of arbitrary key units of the plurality of the key units disposed to the frame with respect to the drive motor.
